JUDICIAL STATISTICS

## Presentation

As part of its policy of transparency, the General Council of the Judiciary (GCJ), has taken, for another year, the step of compiling “The Spanish Judiciary in figures”, which sets out the key statistics for 2013 describing quantitatively the Spanish Court system.

The full document may be accessed at [www.poderjudicial.es](http://www.poderjudicial.es), in Statistics National Plan section, origin of data for this publication, where there is also available the complementary and most updated information.

We would like to thank the judicial bodies cooperation, who are responsible the most of information, as well as the rest of government bodies and institutions providing the information to the Judicial Statistics National Plan.

# **SUMMARY**

## **PERSONNEL TURNOVER** <sup>22</sup>

---

<sup>22</sup> Source: Judicial Statistics of the GCJ

Using the data of the court staff in judicial bodies and the staff status contained in statistics reports, three indicators have been prepared on the staff status, applied to every professional status. These indicators are as follows:

**Percentage of coverage by non-permanent staff (PCNP):** Relationships between the number of days in which positions of a concrete professional status have been occupied by non-permanent staff members, and the total of those professional status members, multiplied by 365. This is expressed as a percentage.

**Percentage of non-covered days (PNCD):** Relationships between the number of days in which positions of a concrete professional status have been uncovered, and the number of those professional status members, multiplied by 365. This is expressed as a percentage.

**Rotation index (RI):** Relationships between of number of investitures both of permanent positions and others, and the staff allocated for that professional status. This is a measurement of the stability of the staff.

## RATES

**Clearance rate:** Relationship between the number of resolved cases and the number of incoming cases during a period of time.

It relates the number of incoming cases to the capability to resolve them.

**Pending rate:** Relationship between the number of unresolved cases at end of the year and the number of resolved cases, in that period. (Inverse relationship of the “case Turnover ratio”).

**Judgement rate:** Relationship between the number of judgements and the number of resolved cases. Data is shown by percent

**Congestion rate.** A quotient where the numerator is the sum of the pending and incoming cases at the beginning of the period and the denominator is the number of resolved cases during that period.

### 2013 Rates. Ordered by Jurisdiction

## **THE QUALITY OF THE COURT SYSTEM**

## JUDGMENTS BY TYPE OF JUDGE

One indicator of the quality of judgments is the percentage of them delivered by professional judges. The data provided in the third column (supplementary) of the following tables refer to non-professional judges.

## COURTS OF APPEAL

Another indicator of the Quality of Justice is the result of heard and returned appeals. The relationship between the appeals filed during the year and the total of judgements (or judgements and writs) can show the appeal rate.

Source: Judicial Statistics. General Council of the Judiciary

### Courts of Civil Jurisdiction

	Appeals submitted higher Court/ Judgements	Appeals returned in the year

## ESTIMATED LENGTH OF PROCEEDINGS

The average length of proceedings is another very important indicator of the Quality of the Justice. As the Judicial Statistics does not offer direct data from lengths, we present a set of evaluation produced by a mathematical model, according to the data from General Council of the Judiciary. Judicial Statistics: Incoming cases, resolved cases and pending proceedings at the beginning of every period of time. It offers an estimation of the average length of the cases ended in each period. **The lengths are stated in months**

### Courts of Civil Jurisdiction

## AVERAGE TIME OF PROCEEDINGS PENDING AT THE END OF THE YEAR

Other way to measure the length of proceedings is to considerate the time that the cases, which have not yet been decided at the end of the year, have been in court. The “average time” has been calculated by a mathematical model according to the data from General Council of the Judiciary. Judicial Statistics. **The lengths are stated in months**

### Courts of Civil Jurisdiction
